### **NEW QUESTION: 1**

You need to recommend a solution to meet the compliance requirements for the Research Department and the statutory Holidays.

What should you recommend configuring?

(To answer, drag the appropriate object to the correct location in the answer area.

Each object may be used once, more than once, or not at all.

Additionally, you may need to drag the split bar between panes or scroll to view content.)

Select and Place:

### **Answer:**

Explanation:

Explanation:

Research Department Compliance Requirement

Box 1: A Transport Rule Box 2: A MailTip

Statutory holiday compliance requirement

Box 3: A Transport Rule

Note: Scenario:

The users in the research department must be able to send email to anyone in the organization, but only the members of a group named Execs must be able to send email to the research users. All other users must be notified that email sent to the research users will remain undelivered.

Transport Rule:

Using Transport rules, you can look for specific conditions on messages that pass through your organization and take action on them.

Transport rules let you apply messaging policies to email messages, secure messages, protect messaging systems, and prevent information leakage.

MailTips:

MailTips are informative messages displayed to users while they're composing a message.

PolicyTips (incorrect):

You can help to prevent your organization's Microsoft Outlook email users from inappropriately sending sensitive information by creating data loss prevention (DLP) policies that include Policy Tip notification messages. Similar to MailTips that were introduced in Microsoft Exchange Server 2010, Policy Tip notification messages are displayed to users in Outlook while they are composing an email message. Policy Tip notification messages only show up if something about the sender's email message seems to violate a DLP policy that you have in place and that policy includes a rule to notify the sender when the conditions that you establish are met. Microsoft Exchange Server 2013 analyzes the message, including the list of recipients to which it's addressed, and if it detects a potential problem, it notifies the user with MailTips prior to sending the message. With the help of the information provided by MailTips, senders can adjust the message they're composing to avoid undesirable situations or non-delivery reports (NDRs).

Scenario: Users must be prevented from sending email during an upcoming statutory holiday.

#### **NEW QUESTION: 4**

How does the Cisco ASA use Active Directory to authorize VPN users?

**A.** It sends the username and password to retrieve an ACCEPT or REJECT message from the Active

Directory server.

**B.** It queries the Active Directory server for a specific attribute for the specified user.

**C.** It downloads and stores the Active Directory database to query for future authorization requests.

**D.** It redirects requests to the Active Directory server defined for the VPN group.

**Answer: B**

Explanation:

Explanation

When ASA needs to authenticate a user to the configured LDAP server, it first tries to login using the login

DN provided. After successful login to the LDAP server, ASA sends a search query for the username provided

by the VPN user. This search query is created based on the naming attribute provided in the configuration.

LDAP replies to the query with the complete DN of the user. At this stage ASA sends a second login attempt

to the LDAP server. In this attempt, ASA tries to login to the LDAP server using the VPN user's full DN and

password provided by the user. A successful login to the LDAP server will indicate that the credentials

provided by the VPN user are correct and the tunnel negotiation will move to the Phase 2.
